FUNMAT PRO 310

Bring Industrial Performance to your Desktop

Industrial Performance

Thermostatic chamber and full-size printing capability.

More possibilities with multi material printing and twice as fast with synchronized and mirror modes.

Independent Filament Box

Keep material continuously dry for high-quality prints.

Unparalleld User Experience

Intelligent design and whole-process control.

The FUNMAT PRO 310 responds to the growing demands of professional engineers with a thermostatic chamber and full-size printing capability on a desktop machine. The thermostatic chamber can reach up to 100 °C (212 °F) to print engineering plastics with a build volume of 305 x 260 x 260 mm. Plug & play and easy-to-remove modular IDEX design provides multiple printing modes.

With whole-process control, the FUNMAT PRO 310 offers engineering material capabilities such as ASA, ABS, PC, PC-ABS, PA and PA-CF with INTAMSYS user-friendly 3D model-slicing software, INTAMSUITE™.
